

## Year 1 Mental Arithmetic Test

Date of Test: 6th November 2025

This week's maths target:

Write and order numbers to at least 10.

0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10,

### Activities

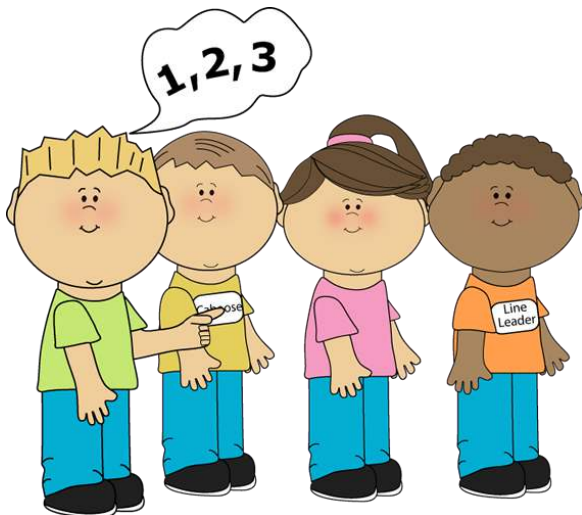

Quickwrite Numbers - Say a number (0-10) to your child, they then have to write the number as quick as possible. They can then say a number for you to write, they have to check if you have written the right number. As your child gets better at the game, speed it up.

Ordering - On the attached sheet are some number cards to 10. Cut these up and ask your child to put them in the right order. When they have done this, ask them to close their eyes. Take away one or more numbers from the line. Ask you child to open their eyes, what numbers are missing? You can then give your child three or four cards to put into the correct order (smallest to biggest) e.g. 0, 4, 1 and 9.

### Example Test Question

(The children will be asked 10 questions in total.)

- ⇒ Write the number 2.
- ⇒ What number comes next; 3,4,5,6, \_?
- ⇒ Put these numbers in the correct order, starting with the smallest; 6, 8, 1.

### Online Learning

Remember to check the websites below for any homework that has been set to support this mental maths test or your child's learning in class.
